### CONTENTS

#### No. 1 (January)

Plasma Triglyceride Transport Kinetics in Diabetes Mellitus .....	<i>Esko A. Nikkilä and Matti Kekki</i>	1
Relationship of Hypermagnesemia and Hyperkalemia to Muscle Mg and K in Acute and Chronic Azotemia in the Rat .....	<i>R. Whang, M. Ryan, and Mabel Orndorff</i>	23
Synthesis of Glucose in Human Thrombocytes .....	<i>N. Nakamura, K. A. Zuppinger, J. P. Colombo, and P. Walter</i>	29
Effect of Glucagon and Glucose Load on Glucose Kinetics, Plasma FFA, and Insulin in Dogs Treated With Methylprednisolone .....	<i>Bela Issekutz, Jr. and Ingrid Borkow</i>	39
Acute Effects of Calcitonin on Bone Formation in Man .....	<i>Stephen M. Krane, Edward D. Harris, Jr., Frederick R. Singer, and John T. Potts, Jr.</i>	51
Mechanism of Chlorpropamide-induced Antidiuresis in Man: Evidence for Release of ADH and Enhancement of Peripheral Action .....	<i>Arnold M. Moses, Patricia Numann, and Myron Miller</i>	59
Transport of Alpha-Methyl-D-Glucoside by Human Kidney Cortex .....	<i>Stanton Segal, Myron Genel, Philip Holtzapple, and Claire Rea</i>	67
Preliminary Report: Effects of Synthetic LH-RH and Its Analogs on Rat Anterior Pituitary Cyclic AMP and LH and FSH Release .....	<i>Toshio Kaneko, Shiro Saito, Hiroschi Oka, Toshitsugu Oda, and Noboru Yanaihara</i>	77
Preliminary Report: Hepatic Acetate Levels in Relation to Altered Lipid Metabolism .....	<i>V. K. Murthy and G. Steiner</i>	81
<i>Progress in Endocrinology and Metabolism</i>		
Mechanisms of Hormonal Induction of Enzymes .....	<i>Thomas D. Gelehrter</i>	85

#### No. 2 (February)

##### Part I

A Controlled Study of Clopamide, Clorexolone, and Hydrochlorothiazide in Diabetics .....	<i>B. H. Hicks, J. D. Ward, R. J. Jarrett, H. Keen, and P. Wise</i>	101
Changes in Plasma Insulin During Ethanol-induced Hypoglycemia .....	<i>R. C. Turner, N. W. Oakley, and J. D. N. Nabarro</i>	111
A Dissociated Effect of Amino-Glutethimide on the Mineralocorticoid Secretion in Man .....	<i>Esteban Mancheno-Rico, Otto Kuchel, Wojciech Nowaczynski, Kewal K. Seth, Chikashi Sasaki, Keith Dawson, and Jacques Genest</i>	123

Simultaneous Measurement of Total Exchangeable Potassium and Sodium Using $^{43}\text{K}$ and $^{24}\text{N}$ .....	<i>D. L. Davies and J. W. K. Robertson</i>	133
Thiazide Diuretics and Calcium Metabolism. ....	<i>Stewart Mittler, Charles Y. C. Pak, Ferid Murad, and Frederic C. Bartter</i>	139
Ectopic Hyperparathyroidism in a Patient With Metastatic Hypernephroma <i>A. James Blair, Jr., Charles D. Hawker, and Robert D. Utiger</i>		147
Absorption of Dietary Cholesterol in Man ....	<i>B. J. Kudchodkar, H. S. Sodhi, and L. Horlick</i>	155
Urinary Excretion of Quinolinic Acid and Other Tryptophan Metabolites After Deoxy- pyridoxine or Oral Contraceptive Administration. ....	<i>D. P. Rose and P. A. Toseland</i>	165
Choice of Intravenous Amino Acid Solutions for Use After Surgical Operation <i>D. E. F. Tweedle, John Spivey, and Ivan D. A. Johnston</i>		173
<i>Progress in Endocrinology and Metabolism</i>		
The Glucose-Alanine Cycle .....	<i>Philip Felig</i>	179

## Part II

### Chemical Diabetes Mellitus in Childhood

#### *Proceedings of a Conference*

Introduction .....	<i>Arlan L. Rosenbloom</i>	209
<i>I. Identification of Chemical Diabetes</i>		
The Definition of Chemical Diabetes .....	<i>Stefan S. Fajans, Chairman</i>	211
Abnormalities at the State of Chemical Asymptomatic Diabetes <i>R. A. Camerini-Davalos, Werner Oppermann, Carlos Velasco, and Harold S. Cole</i>		219
The Definition of Chemical Diabetes in Children .....	<i>R. L. Jackson, R. A. Guthrie, D. W. Guthrie, and H. M. Waiches</i>	229
Oral Glucose Tolerance Tests and Their Reliability .....	<i>R. L. Jackson, R. A. Guthrie, and D. Y. N. Murthy</i>	237
The Intravenous Glucose Tolerance Test in Chemical Diabetes .....	<i>R. L. Jackson, R. A. Guthrie, D. Y. N. Murthy, and J. Lang</i>	247
Chemical Diabetes Mellitus in the Child. ....	<i>Allan Drash</i>	255
Hemoglobin A <sub>1c</sub> in Childhood Diabetes .....	<i>Elsa P. Paulsen</i>	269
<i>II. Interpretation Criteria for OGTT</i>		
Introduction .....	<i>Arlan L. Rosenbloom, Chairman</i>	273
Standardization of the Oral Glucose Tolerance Test and the Criteria for Diagnosis of Chemical Diabetes in Children .....	<i>R. A. Guthrie, D. W. Guthrie, D. Y. N. Murthy, R. L. Jackson, and J. Lang</i>	275
Chemical Diabetes in Children: Glucose Tolerance Tests ...	<i>Marion J. Balsam, Robert Kaye, and Lester Baker</i>	283
Carbohydrate Metabolism in Children: (1) Blood Sugar, Serum Insulin, and Growth Hormone During Oral Glucose Tolerance Tests; (2) Blood Sugar During the Cortisone Glucose Tolerance Test. ....	<i>Harold S. Cole</i>	289
Glucose Tolerance Sums and Glucose:Insulin Ratios in Children <i>Ramesh C. Khurana, Allan Drash, Judith Howland, and T. S. Danowski</i>		295

Criteria for Interpretation of the Oral Glucose Tolerance Test in Children and Insulin Responses With Normal and Abnormal Tolerance .....	<i>Arlan L. Rosenbloom</i>	301
Adult-onset Diabetes Mellitus in Childhood .....	<i>Rosita S. Pildes</i>	307
<i>III. Who Shall Be Studied?</i>		
Introduction .....	<i>Richard A. Guthrie, Chairman</i>	317
Screening for Glucose Intolerance in a Pediatric Multiphasic Program .....	<i>Arlan L. Rosenbloom and Constance M. Allen</i>	319
Mass Urine Glucose Screening in Children .....	<i>Arlan L. Rosenbloom and Constance M. Allen</i>	323
Studies on the Natural History of Asymptomatic Diabetes in Young People .....	<i>Stefan S. Fajans, John C. Floyd, Sumer Pek, and Jerome W. Conn</i>	327
Relationship Between Diabetes Mellitus and Obesity in the Child .....	<i>Allan Drash</i>	337
Chemical Diabetes in the Juvenile Patient .....	<i>Eleanor Colle and Mimi M. Belmonte</i>	345
Screening for Glucose Intolerance in Siblings of Children With Diabetes .....	<i>Arlan L. Rosenbloom, Raymond Bianchi, and Frank T. W. Chin</i>	351
The Genetics of Diabetes .....	<i>Jaime L. Frias and Arlan L. Rosenbloom</i>	355
Metabolic Aspects of Obesity .....	<i>Robert B. Schultz</i>	359
Glucose Tolerance Testing in Children With Random Glucosuria With Symptoms Suggestive of Hypoglycemia and With Idiopathic Hypoglycemia of Infancy .....	<i>Arlan L. Rosenbloom and Lawrence Sherman</i>	363
Conclusions .....	<i>Richard A. Guthrie and Arlan L. Rosenbloom</i>	369
<i>IV. Therapy of Chemical Diabetes</i>		
Introduction .....	<i>Allan Drash, Chairman</i>	371
Treatment of Chemical Diabetes Mellitus With Sulfonyleurea Compounds .....	<i>Stefan S. Fajans</i>	373
Treatment of the Child With Chemical Diabetes Mellitus .....	<i>Allan Drash</i>	377
Experiences in Sulfonyleurea Therapy .....	<i>Elsa P. Paulsen</i>	381
Criteria for the Selection of Patients for Treatment With Tolbutamide .....	<i>R. A. Guthrie, D. W. Guthrie, H. W. Baker, and R. L. Jackson</i>	387
Early Diabetes Mellitus in Children .....	<i>Robert M. Ehrlich and Julio M. Martin</i>	391
Chemical Diabetes in Children: Tolbutamide Experience .....	<i>Marion J. Balsam, Robert Kaye, and Lester Baker</i>	393
Tolbutamide in Chemical Diabetes Mellitus in Children .....	<i>Arlan L. Rosenbloom</i>	399
Insulin Treatment of Children With Late Chemical Diabetes .....	<i>R. L. Jackson, R. A. Guthrie, and D. Y. N. Murthy</i>	403
<i>V. Conference Summary</i>		
Chemical Diabetes in Childhood .....	<i>Arlan L. Rosenbloom, Allan Drash, and Richard Guthrie</i>	413
Conference Participants .....		421

## No. 3 (March) 1973

The Chick as a Laboratory Model for the Study of Estrogen-induced Hyperlipidemia <i>David J. Kudzma, Paul M. Hegstad, and Raymond E. Stoll</i>	423
Genetic Obesity in Rats. I. The Effects of Food Restriction on Body Composition and Hypothalamic Function ..... <i>George A. Bray, David A. York, and Ronald S. Swerdloff</i>	435
Genetic Obesity in Rats. II. The Effect of Food Restriction on the Metabolism of Adipose Tissue ..... <i>David A. York and George A. Bray</i>	443
The Stimulus-Secretion Coupling of Glucose-induced Insulin Release. XI. Effects of Theophylline and Epinephrine on $^{45}\text{Ca}$ Efflux From Perfused Islets <i>Guy R. Brisson and Willy J. Malaisse</i>	455
Glucose Metabolism by Rat Pancreatic Islets In Vitro ... <i>Andy C. Reese, Bernard R. Landau, James W. Craig, Gary Gin, and Harvey M. Rodman</i>	467
Effect of Physical Training on Esterification of Glycerol-3-Phosphate by Homogenates of Liver, Skeletal Muscle, Heart, and Adipose Tissue of Rats ..... <i>E. Wayne Askew, Richard L. Huston, and G. Lynis Dohm</i>	473
The Effect of Potassium and Extracellular Volume on Renal Bicarbonate Reabsorption <i>Neil A. Kurtzman, Martin G. White, and Philip W. Rogers</i>	481
Pyruvate Kinase Isoenzymes in Progressive Muscular Dystrophy and in Acute Myocardial Infarction ..... <i>Yutaka Harano, Richard Adair, Paul J. Vignos, Jr., Max Miller, and J. Kowal</i>	493
Preliminary Report: Mechanism of Action of Cortisol on Glucose Metabolism by Adipose Tissue ..... <i>A. Kawai, H. Takashima, and N. Kuzuya</i>	503
<i>Progress in Endocrinology and Metabolism</i>	
Vitamin D: Current Concepts ..... <i>Louis V. Avioli and John G. Haddad</i>	507
Statement on Hypoglycemia .....	533

## No. 4 (April)

Relationship Between Plasma and Erythrocyte Magnesium and Potassium Concentrations in Fasting Obese Subjects ..... <i>William K. Stewart and Laura W. Fleming</i>	535
A Study of Plasma Free Amino Acid Levels. I. Study of Factors Affecting Validity of Amino Acid Analyses ..... <i>Marvin D. Armstrong and Uwe Stave</i>	549
A Study of Plasma Free Amino Acid Levels. II. Normal Values for Children and Adults <i>Marvin D. Armstrong and Uwe Stave</i>	561
A Study of Plasma Free Amino Acid Levels. III. Variations During Growth and Aging <i>Marvin D. Armstrong and Uwe Stave</i>	571
Basal Metabolism and Age of Adult Man ..... <i>Ansel Keys, Henry L. Taylor, and Francisco Grande</i>	579
Body Composition Changes in Children Receiving Human Growth Hormone <i>P. J. Collipp, V. Curti, J. Thomas, R. K. Sharma, V. T. Maddaiah, and S. H. Cohn</i>	589
Rod Myopathy: Beta Globulin Peak and Increased Complement. .... <i>T. S. Danowski, E. R. Fisher, N. Wald, J. W. Vester, and Z. A. Zawadzki</i>	597
Effects of Alpha-Aminoisobutyric Acid on Urinary Excretion of Homocystine in Patients With Homocystinuria ..... <i>Z. Myron Falchuk, William A. Edwards, and Leonard Laster</i>	605

Phosphate Depletion and Glucocorticoid-induced Hyperphosphatemia in Lymphoblastic Leukemia .....	<i>David R. Clarkson, Joan Blondin, and Phillip E. Cryer</i>	611
L-Thyroxine in the Treatment of Obesity Without Increase in Loss of Lean Body Mass .....	<i>L. Lamki, C. Ezrin, I. Koven, and G. Steiner</i>	617
Preliminary Report: Difference in Binding of $^{14}\text{C}$ and Tritium-labeled Testosterone by the Sex-binding Globulin (SBG).....	<i>Michael J. Caputo, Thomas A. Hosty, and Hewlett E. Melton</i>	623
<i>Progress in Endocrinology and Metabolism</i>		
Galactose Metabolism and Its Regulation .....	<i>Robert M. Cohn and Stanton Segal</i>	627

## No. 5 (May)

Festschrift in Honor of  
MARTIN G. GOLDNER, M.D.

Sheldon J. Bleicher, M.D., Guest Editor

Introduction .....	<i>Rachmiel Levine</i>	645
Sodium-dependent Sugar Transport in the Intestine.....	<i>Andrew M. Goldner</i>	649
Current Status of Diabetic Neuropathy .....	<i>Max Ellenberg</i>	657
Studies of Tumor Hypoglycemia.....	<i>Faizur Chowdhury and Sheldon J. Bleicher</i>	663
Pattern of Sodium Excretion Accompanying Starvation .....	<i>Philip R. Boulter, Richard S. Hoffman, and Ronald A. Arky</i>	675
Hyperosmolar Nonketotic Diabetic Coma: A Complication of Propranolol Therapy .....	<i>Stephen Podolsky and Catherine G. Pattavina</i>	685
Androgen Metabolism in Cirrhosis of the Liver .....	<i>A. Louis Southren, Gary G. Gordon, Jaime Olivo, Fereidoon Rafii, and William S. Rosenthal</i>	695
"Big, Big Insulin" .....	<i>Rosalyn S. Yalow and Solomon A. Berson</i>	703
Unilateral Nodular Diabetic Glomerulosclerosis (Kimmelstiel-Wilson): Report of a Case .....	<i>James Berkman and Harold Rifkin</i>	715
Effect of Chlorpropamide Treatment on Insulin Secretion in Diabetics: Its Relationship to the Hypoglycemic Effect .....	<i>Arthur Hecht, Herbert Gershberg, and Mildred Hulse</i>	723
A Calcitonin Radioimmunoassay: In Vivo Evaluation of Calcitonin Secretion in the Pig .....	<i>J. Thomas Pento, Seymour M. Glick, and Avir Kagan</i>	735
Plasma Cortisol During Normal Glucose Tolerance.....	<i>Harvey M. Rodman and Sheldon J. Bleicher</i>	745
Preliminary Report: Plasma Levels of Colchicine After Oral Administration of a Single Dose .....	<i>Stanley L. Wallace and Norman H. Ertel</i>	749
Renal Glycosuria in Normoglycemic Glycosuric Pregnancy: A Quantitative Study .....	<i>Harold Zarowitz and Stanley Newhouse</i>	755

## No. 6 (June)

Preliminary Report: Effect of Clofibrate on Arginine-induced Insulin and Glucagon Secretion.....	<i>R. P. Eaton</i>	763
--	--------------------	-----

Preliminary Report: Effects of a Purified Growth Hormone Releasing Factor on Growth Hormone Secretion and Pituitary Cyclic Nucleotide Content .....	Glenn T. Peake, Melba Wilson, Alton L. Steiner, and Anand P. S. Dhariwal	769
Glucose-suppressible Growth Hormone Release After L-Dopa Administration to Normal Subjects .....	Klaus Johansen	773
Precursors of Plasma Triglyceride Fatty Acids in Obesity .....	Philip J. Barter and Paul J. Nestel	779
Influence of Posture on the Serum Concentration of Calcium .....	Harry Husdan, Abraham Rapoport, and Sandra Locke	787
Increase of Microsomal Glucose-6-Phosphatase Activity After Chronic Ethanol Administration .....	Hiromasa Ishii, Jean-Gil Joly, and Charles S. Lieber	799
Triglyceride Removal Efficiency and Lipoprotein Lipases: Effects of Oxandrolone .....	C. J. Glueck, S. Ford, Jr., P. Steiner, and R. Fallat	807
Effect of Exercise on Splanchnic Exchange of Free Fatty Acids .....	Lars Hagenfeldt and John Wahren	815
A Study of Plasma Free Amino Acid Levels. IV. Characteristic Individual Levels of the Amino Acids .....	Marvin D. Armstrong and Uwe Stave	821
A Study of Plasma Free Amino Acid Levels. V. Correlations Among the Amino Acids and Between Amino Acids and Some Other Blood Constituents .....	Marvin D. Armstrong and Uwe Stave	827
A Study of Plasma Free Amino Acid Levels. VI. High Plasma Glycine Levels of Some Women .....	Marvin D. Armstrong and Uwe Stave	835
<i>Progress in Endocrinology and Metabolism</i>		
Contraceptive Steroids: Modifications of Carbohydrate and Lipid Metabolism ...	Paul Beck	841
Acknowledgment .....		856

## No. 7 (July)

Increased TSH Secretion in Rats Resulting From Adiphenine Administration .....	René Mornex, Hélène Durand, François Berthezene, Jacques Tourniaire, Bernard Rousset, and Daniel Jordan	859
The Roles of Carbohydrate, Renin, and Aldosterone in Sodium Retention During and After Total Starvation .....	E. S. Garnett, H. Cohen, C. Nahmias, and G. Viol	867
Leydig Cell Function in Klinefelter's Syndrome .....	Monica Stewart-Bentley and Richard Horton	875
Mechanism of Xylitol Toxicity in the Rabbit .....	Yeu-Ming Wang, Synthia M. King, Janis H. Patterson, and Jan van Eys	885
Synthesis of Cholesterol in Hypercholesterolemia and Its Relationship to Plasma Triglycerides .....	H. S. Sodhi and B. J. Kudchodkar	895
Comparison of Free Fatty Acid and Glyceride-Fatty Acid Uptake by Human Adipose Tissue .....	J. P. D. Wilson, R. Gutman, and D. J. Galton	913
Preliminary Report: Sex Dependence of Aldosterone Response in Rats .....	David J. Morris, Jonathan S. Berek, and Robert P. Davis	923
Effects of Oral Alanine Administration in Fasting Obese Subjects .....	Saul M. Genuth	927

*Progress in Endocrinology and Metabolism*

- Current Concepts in the Pathogenesis of Hyperuricemia ..... William N. Kelley,  
Wolfgang Grobner, and Edward Holmes 939

## No. 8 (August)

Festschrift in Honor of  
SOLOMON A. BERSON, M.D.

Seymour Glick, M.D., and Sheldon P. Rothenberg, M.D.

*Guest Editors*

Introduction .....	Seymour Glick and Sheldon P. Rothenberg	961
Solomon A. Berson Memorial Service .....	William S. Middleton, Marc J. Musser, Jesse Roth, Irving Graef, Louis J. Soffer, Rolf Luft, Joseph E. Rall, and Rosalyn Yalow	963
Insulin .....	I. Arthur Mirsky	973
Radioimmunoassay of Glucagon .....	Roger H. Unger	979
The Physiology of Growth Hormone Regulation: Pre- and Postimmunoassay Eras .....	Seymour Reichlin	987
The Impact of Radioimmunoassay on Our Understanding of Human Adrenal Physiology .....	Charles D. West and Frank H. Tyler	995
Impact of Radioassay Techniques on the Field of Sex Hormones .....	P. Franchimont, H. Burger, and J. J. Legros	1003
Radioassay of the Calcitropic Hormones .....	Claude D. Arnaud	1013
Radioassay and the Thyroid Gland .....	Jacob Robbins	1021
Application of Radioimmunoassay to the Renin-Angiotensin System and to Aldosterone .....	Stanley Ulick	1027
How Radioimmunoassay Has Added to Our Knowledge About Gastrin .....	Morton I. Grossman	1033
Human Prolactin in Clinical Endocrinology: The Impact of Radioimmunoassays .....	Henry G. Friesen	1039
Radioimmunoassay of Posterior Pituitary Peptides: A Review .....	Alan G. Robinson and Andrew G. Frantz	1047
Peptide Hormone Binding to Receptors: A Review of Direct Studies In Vitro .....	Jesse Roth	1059
Application of Competitive Ligand Binding for the Radioassay of Vitamin B <sub>12</sub> and Folic Acid .....	Sheldon P. Rothenberg	1075
Measurement of Steroid Hormones Using Intracellular Receptor Proteins .....	Stanley G. Korenman	1083
Radioimmunoassay of Enzymes .....	Jean-Pierre Felber	1089
Competitive Ligand-binding Radioassays for Serum Proteins .....	Thomas P. Conway and Ursula Muller-Eberhard	1097
Detection of Virus Antigens: Hepatitis B Antigen .....	John H. Walsh	1111
Competitive Radioassays and "Specific" Tumor Markers .....	Bruce D. Weintraub and Saul W. Rosen	1119

Physiologic Implications of Prostaglandin Radioimmunoassay .....	<i>Bernard M. Jaffe and Charles W. Parker</i>	1129
Application of Competitive Ligand-binding Radioassays to the Nucleotides	<i>Alton L. Steiner</i>	1139
Radioimmunoassay and Competitive Binding Radioassay Methods for the Measurement of Drugs .....	<i>Vincent P. Butler, Jr.</i>	1145

### No. 9 (September)

Observations of the Mechanism of Action of the Sulfonylureas Under Clinical Conditions .....	<i>W. P. U. Jackson, W. Van Mieghem, and P. Keller</i>	1155
Effect of Single Large Doses of Oral Calcium on Serum Calcium Levels in the Young and the Elderly .....	<i>S. Epstein, W. Van Mieghem, J. Sagel, and W. P. U. Jackson</i>	1163
The Role of Dietary Protein in Generating Daily Rhythms in Rat Liver Tryptophan Pyrrolase and Tyrosine Transaminase .....	<i>Douglas S. Ross, John D. Fernstrom, and Richard J. Wurtman</i>	1175
Effect of Thyrotropin and of LATS on Mouse Thyroid Cyclic AMP .....	<i>M. Zakarija and J. M. McKenzie</i>	1185
Influence of Nicotinic Acid on the Rates of Turnover and Oxidation of Plasma Glucose in Man .....	<i>E. O. Balasse and M. A. Neef</i>	1193
Incorporation of Orally Administered Glucose-U- <sup>14</sup> C and Fructose-U- <sup>14</sup> C Into the Tri- glyceride of Liver, Plasma, and Adipose Tissue of Rats .....	<i>Yoshisuke Maruhama and Ian Macdonald</i>	1205
Monolayer Culture of a Human Pancreatic Beta-cell Adenoma .....	<i>William L. Chick, Vilma Lauris, J. Stuart Soeldner, Meng H. Tan, and Marta Grinbergs</i>	1217
Binding of Human LH to Particulate Fraction of Rat Testis: Disparity in LH:IRP Equipotency Ratios in Immuno- and Ligand Assay .....	<i>B. Schneider, R. Benveniste, I. Spitz, and D. Rabinowitz</i>	1225
<i>Progress in Endocrinology and Metabolism</i>		
A Survey of Growth Hormone Secretion and Action ...	<i>Thomas J. Merimee and David Rabin</i>	1235

### No. 10 (October)

Effect of Fasting on Alanine-stimulated Insulin and Glucagon Secretion .....	<i>Maire T. Buckman, Martin J. Conway, J. A. Seibel, and R. Philip Eaton</i>	1253
A Study of Plasma Free Amino Acid Levels. VII. Parent-Child and Sibling Correlations in Amino Acid Levels .....	<i>Marvin D. Armstrong and Uwe Stave</i>	1263
Reduction of Growth Hormone Secretion Following Clomiphene Administration .....	<i>Mark Perlow, Jon Sassin, Robert Boyar, Leon Hellman, and Elliot D. Weitzman</i>	1269
Disassociation of the Plasma Insulin Response From the Blood Glucose Concentration During Glucose Infusions in Normal Dogs .....	<i>Jerrold Olefsky, Timothy Batchelder, John W. Farquhar, and Gerald M. Reaven</i>	1277
Familial Hypertriglyceridemia: Studies in 130 Children and 45 Siblings of 36 Index Cases .....	<i>C. J. Glueck, R. Tsang, R. Fallat, C. R. Buncher, G. Evans, and P. Steiner</i>	1287

Relationship Between Fasting Plasma Lipid Levels and Adipose Tissue Morphology <i>Michael P. Stern, Jerrold Olefsky, John W. Farquhar, and Gerald M. Reaven</i>	1311
<i>Progress in Endocrinology and Metabolism</i>	
Vitamin-responsive Inborn Errors of Metabolism..... <i>Charles R. Scriver</i>	1319

## No. 11 (November)

Preliminary Report: Endobronchial Lavage Phospholipids and Protein in Rats Protected From Oxygen Toxicity by Hypoxia Pretreatment ..... <i>Richard E. Brashear and Joe C. Christian</i>	1345
Plasma Levels of Free Polyunsaturated Fatty Acids in Patients With Ischemic Heart Disease <i>Lars Hagenfeldt, Juhani Paasikivi, and Andreas Sjögren</i>	1349
Response to Thyrotropin-releasing Hormone Compared With Thyroid Suppression Tests in Euthyroid Graves' Disease..... <i>Pedro S. Franco, Jerome M. Hershman, E. David Haigler, Jr., and James A. Pittman, Jr.</i>	1357
Homeostatic Responses to Glucose Loading in Newborn and Young Dogs ..... <i>S. Varma, H. Nickerson, J. S. Cowan, and G. Hetenyi, Jr.</i>	1367
Protein Metabolism in Rats With Ventromedial Hypothalamic Lesions ..... <i>Halvor Holm, Bo E. Hustvedt, and Arne Løv</i>	1377
Effect of the Daily Injection of Tolbutamide Into Pregnant Rats on the Pancreatic Insulin Content of Their Offspring ..... <i>Jean C. Sodoyez and Francoise R. Sodoyez-Goffaux</i>	1389
Glucose Tolerance, Plasma Insulin, and Lipids in Intermittent Claudication With Reference to Muscle Metabolism ..... <i>Jan Holm, Ann-Gret Dahllöf, Per Björntorp, and Tore Scherstén</i>	1395
Familial Combined Hyperlipoproteinemia: Studies in 91 Adults and 95 Children From 33 Kindreds ..... <i>C. J. Glueck, R. Fallat, C. R. Buncher, R. Tsang, and P. Steiner</i>	1403
Potential Use of 3-Methylhistidine Excretion as an Index of Progressive Reduction in Muscle Protein Catabolism During Starvation ..... <i>Vernon R. Young, Linda N. Haverberg, Christine Bilmazes, and Hamish N. Munro</i>	1429
A Study of Plasma Free Amino Acid Levels. VIII. The Relationship Between Plasma Amino Acid Levels and I.Q. Test Performance..... <i>Marvin D. Armstrong, Robert B. McCall, and Uwe Stave</i>	1437
Cortisol Metabolism in Glucose-6-Phosphate Dehydrogenase Deficiency ..... <i>P. L. So, T. K. Chan, S. K. Lam, C. S. Teng, Rose T. T. Yeung, and D. Todd</i>	1443

## No. 12 (December)

Inhibition of Insulin Release During Hypovolemic Shock ..... <i>Gerard M. Cerchio, P. A. Persico, and Henry Jeffay</i>	1449
Correlation Between Altered Acetate Utilization and Hyperphagia in Rats With Ventromedial Hypothalamic Lesions ..... <i>Arne Løv and Bo-Egil Hustvedt</i>	1459
Physical Training in Human Obesity. III. Effects of Long-term Physical Training on Body Composition ..... <i>Per Björntorp, Kristina de Jonge, Marcin Krotkiewski, Lars Sullivan, Lars Sjöström, and Jesper Stenberg</i>	1467
Feedback Regulation of Bile Acid Formation in Man ..... <i>Kurt Einarsson, Kjell Hellström, and Mora Kallner</i>	1477

Ascorbic Acid Metabolism in Castrated Rats.....	<i>P. V. Khandwekar, M. K. Deshpande, N. Nath, and M. C. Nath</i>	1485
Dietary Regulation of Human Growth Hormone Secretion .....	<i>Thomas J. Merimee and S. Edwin Fineberg</i>	1491
Effect of Oral Contraceptives on Urinary Metabolite Excretions After Administration of L-Tryptophan or L-Kynurenine Sulfate .....	<i>J. E. Leklem, D. P. Rose, and R. R. Brown</i>	1499
<i>Progress in Endocrinology and Metabolism</i>		
On the Control of Cholesterol Synthesis .....	<i>Walter M. Bortz</i>	1507
Aldosterone: Review of Its Physiology and Diagnostic Aspects of Primary Aldosteronism	<i>R. Horton</i>	1525
Annual Indexes .....		1546

adrenal hemorrhage as a completion of adrenal venography in primary aldosteronism. *Radiol* 90:778, 1968

## SUBJECT INDEX

- Absorption, of dietary cholesterol, 155-162
- Acetate  
   hepatic levels in altered lipid metabolism, 81-84  
   utilization of, and hyperphagia with hypothalamic lesions, 1459-1465
- ACTH  
   binding to receptors, 1060  
   radioimmunoassay of, 996-999
- Adenosine monophosphate, cyclic  
   and growth hormone secretion, 769-771  
   pituitary, synthetic LH-RH affecting, 77-79  
   radioimmunoassay of, 1139-1143  
   thyroid, LATS, and thyrotropin affecting, 1185-1190  
   and tyrosine aminotransferase activity, 98
- Adiphenine, affecting TSH secretion, 859-864
- Adipose tissue  
   carbohydrates incorporated into triglycerides of, 1205-1214  
   glucose metabolism in, cortisol affecting, 503-506  
   glyceride-fatty acids in, 913-920  
   glyceride synthesis in, exercise affecting, 473-479  
   metabolism affected by food restriction, 443-453  
   morphology of, and fasting plasma lipid levels, 1311-1316
- Adrenal steroids, radioimmunoassay of, 995-1000
- Age  
   and amino acid variations, 571-577  
   and basal metabolism, 579-586  
   and effects of single large doses of oral calcium, 1163-1172
- Alanine  
   corticosteroids affecting metabolism of, 188-190  
   deficiency states, 192-193  
   and gluconeogenesis, 179-200  
   in starvation, 190-192  
   hyperalaninemic conditions, 193-196  
   metabolism in diabetes, 185-187  
   and nitrogen metabolism, 199  
   oral doses in fasting obese subjects, 927-936
- Albumin, radioimmunoassay of, 1105
- Alcohol. *See* Ethanol
- Aldosterone  
   amino-glutethimide affecting secretion of, 123-131  
   and diagnostic aspects of primary aldosteronism, 1525-1540  
   radioimmunoassay of, 1027-1030  
   renal response to, sex dependence of, 923-926  
   and sodium retention in starvation, 867-874
- Amino acids  
   characteristic individual levels of, 821-824  
   correlations among, 827-833  
   factors affecting validity of analyses, 549-559  
   glucose-alanine cycle, 179-200  
   high plasma glycine levels in women, 835-838

## Amino acids—(Continued)

- intravenous solutions after surgery, 173-178
- and I.Q. test performance, 1437-1441
- normal values for children and adults, 561-568
- parent-child and sibling correlations in levels of, 1263-1268
- variations during growth and aging, 571-577
- Amino-glutethimide, affecting mineralocorticoid secretion, 123-131
- $\alpha$ -Aminoisobutyric acid, affecting homocystine excretion, 605-609
- Androgen metabolism, in cirrhosis, 695-701
- Angiotensin
  - binding to receptors, 1060
  - radioimmunoassay of, 1027-1030
- Anticonvulsant therapy, vitamin D with, 519-520
- Antidiuresis, from chlorpropamide, 59-65
- Ascorbic acid metabolism, in castrated rats, 1485-1489
- Azotemia, and magnesium and potassium content of muscle, 23-26
- Barbiturates, radioassay for measurements of, 1146
- Basal metabolism, and age of adult man, 579-586
- Basement membrane, capillary, in chemical diabetes in childhood, 227
- Berson, Solomon A., 961-971
- Bicarbonate, reabsorption affected by potassium and extracellular volume, 481-491
- Bile acid formation, feedback regulation of, 1477-1482
- Blood velocity, linear, in chemical diabetes in childhood, 226
- Body composition
  - food restriction affecting, 435-441
  - growth hormone affecting, 589-594
  - long-term physical training affecting, 1467-1474
- Bone
  - calcitonin affecting formation of, 51-58
  - metabolism disorders, vitamin D role in, 513-516
- Calciotropic hormones, radioimmunoassay of, 1013-1019
- Calcitonin
  - affecting bone formation, 51-58
  - binding to receptors, 1060
  - radioimmunoassay of, 735-743, 1013-1019
- Calcium
  - posture affecting levels of, 787-796
  - single large doses, effects of, 1163-1172
  - thiazide diuretics affecting metabolism of, 139-145
  - transport across beta-cell membrane, agents affecting, 455-465
- Capillary basement membrane, in chemical diabetes in childhood, 227
- Carbohydrate
  - incorporation into triglycerides, 1205-1214
  - metabolism of
    - in children, 289-293
    - oral contraceptives affecting, 841-852
    - sodium-dependent sugar transport in intestine, 649-654
    - and sodium retention in starvation, 867-874
- Castrated rats, ascorbic acid metabolism in, 1485-1489
- Catecholamines, binding to receptors, 1060
- Chlorpropamide
  - affecting insulin secretion in diabetics, 723-732
  - antidiuretic action of, 59-65
- Cholesterol
  - dietary, absorption of, 155-162
  - plasma levels
    - in chemical diabetes in childhood, 223
    - in familial combined hyperlipoproteinemia, 1403-1427
  - synthesis of
    - control of, 1507-1518
    - in hypercholesterolemia, 895-910
- Cirrhosis, androgen metabolism in, 695-701
- Claudication, intermittent, glucose tolerance tests, and insulin levels in, 1395-1401
- Clofibrate, affecting insulin and glucagon secretion, 763-766
- Clomiphene, affecting growth hormone secretion, 1269-1274
- Clopamide, effects in diabetes, 101-107
- Clorexolone, effects in diabetes, 101-107
- Colchicine, plasma levels after oral dose of, 749-753
- Coma, diabetic, from propranolol, 685-692
- Complement
  - levels in nemaline myopathy, 597-601
  - radioimmunoassays of, 1102-1003
- Contraceptives, oral
  - affecting carbohydrate and lipid metabolism, 841-852
  - and excretion of tryptophan metabolites, 165-170, 1499-1504
  - and vascular disease development, 850-851
- Corticosteroids, and alanine metabolism, 188-190
- Corticosterone secretion, amino-glutethimide affecting, 123-131

- Cortisol**  
affecting glucose metabolism by adipose tissue, 503-506  
metabolism in G-6-PD deficiency, 1443-1447  
plasma levels during normal glucose tolerance, 745-747
- Cortisone glucose tolerance test**, 289-293
- Cushing's syndrome**, ACTH levels in, 998
- Deoxycortisol secretion**, amino-glutethimide affecting, 123-131
- Deoxypyridoxine**, and excretion of tryptophan metabolites, 165-170
- Dexamethasone**, and amino-glutethimide effects on mineralocorticoid secretion, 123-131
- Diabetes**  
alanine metabolism in, 185-187  
chemical, in children, 211-417  
and abnormal glucose tolerance with glucosuria, 363-368  
abnormalities in, 219-227  
and adult-onset diabetes, 307-314  
and carbohydrate metabolism studies, 289-293  
definitions of, 211-216, 229-235  
and fluctuations in glucose tolerance tests, 327-336  
follow-up studies on nine children, 345-349  
and glucose:insulin ratios, 286, 295-300, 304  
hemoglobin alterations in, 269-271  
hereditary factors in, 355-357  
identification of, 211-271  
insulin treatment of, 403-411  
and interpretation of oral glucose tolerance testing, 273-315  
intravenous glucose tolerance test in, 247-253  
mass urine glucose screening in, 323-326  
and metabolic aspects of obesity, 359-362  
natural history of, 211-214, 327-336  
and obesity, 337-344, 359-362  
population for study of, 317-369  
and reliability of oral glucose tolerance tests, 237-245  
and screening for glucose intolerance, 319-322  
and screening of siblings of patients with diabetes, 351-354  
in siblings of children with overt diabetes, 255-267  
stages of, 230-231  
sulfonylurea compounds in, 373-402  
summary of conference on, 413-417  
treatment of, 371-411  
and coma from propranolol, 685-692  
diuretic agents in, effects of, 101-107  
neuropathy in, 657-661  
nodular glomerulosclerosis in, unilateral, 715-722  
remissions of, 214-215  
sulfonylureas in, 1155-1161  
in chemical diabetes in children, 373-402  
triglyceride transport kinetics in, 1-19
- Diet**  
cholesterol in, absorption of, 155-162  
hyperphagia with hypothalamic lesions, and acetate utilization, 1459-1465  
protein in, and hepatic enzyme rhythm, 1175-1183  
and regulation of growth hormone secretion, 1491-1497  
restricted. *See* Fasting
- Digitoxin**, radioassay for measurements of, 1146
- Diphenylhydantoin**, radioassay for measurements of, 1150
- Diuretics**  
affecting glucose levels in diabetes, 101-107  
and calcium metabolism, 139-145
- L-Dopa therapy**, and growth hormone release, 773-777
- Drug measurements**, radioassay for, 1145-1150
- Endobronchial lavage phospholipids**, in hypoxia-pretreated rats, 1345-1347
- Enzymes**  
hepatic, dietary proteins affecting, 1175-1183  
induction by hormones, 85-98  
radioimmunoassay of, 1089-1094
- Epinephrine**, affecting calcium transport across beta-cell membrane, 455-465
- Estrogen**  
hyperlipidemia from, chicks for study of, 423-433  
radioimmunoassay of, 1083-1086
- Ethanol**  
affecting microsomal glucose-6-phosphatase, 799-804  
hypoglycemia from, plasma insulin levels in, 111-120
- Exercise**  
and glucose metabolic pathways in muscle, 1394-1401  
and glyceride synthesis, 473-479  
long-term training affecting body composition, 1467-1474  
and splanchnic exchange of free fatty acids, 515-820
- Extracellular volume**, affecting renal bicarbonate reabsorption, 481-491

- Eye vessels, in chemical diabetes in childhood, 225-226
- Fasting
- affecting insulin and glucagon secretion, 1253-1261
  - and alanine role in gluconeogenesis, 190-192
  - effects in Fatty rats, 435-453
  - hepatic acetate levels in, 81-84
  - lipid levels in, and adipose tissue morphology, 1311-1316
  - muscle catabolism in, and 3-methylhistidine excretion, 1429-1435
  - oral alanine effects in, 927-936
  - plasma and erythrocyte magnesium and potassium levels in, 535-546
  - sodium excretion in, 675-681
  - sodium retention in, factors affecting, 867-874
- Fatty acids
- growth hormone affecting metabolism of, 1248
  - plasma levels
    - in chemical diabetes in childhood, 262
    - glucagon affecting, after methylprednisolone therapy, 39-48
    - in glucose loading in young dogs, 1372
    - in ischemic heart disease, 1349-1356  - precursors in plasma, in obesity, 779-784
  - splanchnic exchange of, exercise affecting, 815-820
  - uptake by adipose tissue, 913-920
- Feedback regulation of bile acid formation, 1477-1482
- Fellowships available, 643, 762, 857
- Fibrinogen, radioimmunoassay of, 1103
- Folic acid, radioimmunoassay of, 1075-1080
- Follicle-stimulating hormone
- food restriction affecting levels of, 439-440
  - radioimmunoassay of, 1003-1005
  - synthetic LH-RH affecting release of, 77-79
- Food intake. *See* Diet
- Fructose, incorporation into triglycerides, 1205-1214
- Galactose, metabolism of, 627-639
- Gastrin, radioimmunoassay of, 1033-1037
- Gastrointestinal tract
- absorption of dietary cholesterol, 155-162
  - sugar transport in intestines, sodium-dependent, 649-654
  - vitamin D role in disorders of, 516-519
- Genetic factors in diabetes, 355-357
- Gentamicin, radioassay for measurements of, 1150
- Globulin
- beta peaks in nemaline myopathy, 597-601
  - sex-binding, testosterone binding by, 623-625
- Glomerulosclerosis
- in chemical diabetes in childhood, 226
  - nodular diabetic, unilateral, 715-722
- Glucagon
- binding to receptors, 1060
  - clofibrate affecting secretion of, 763-766
  - fasting affecting secretion of, 1253-1261
  - interaction with alanine, 187-188
  - radioimmunoassay of, 979-984
  - responses to, after methylprednisolone therapy, 39-48
- Glucocorticoids
- and alanine metabolism, 188-190
  - and induction of tyrosine aminotransferase, 89-93
  - metabolic effects of, 39-48
  - phosphate depletion from, in leukemia, 611-615
- Gluconeogenesis
- alanine role in, 179-200
  - in starvation, 190-192
  - and glutamine metabolism, 199-200
- Glucose
- hypoglycemia
    - and asymptomatic glycosuria, 363-368
    - ethanol-induced, plasma insulin levels in, 111-120
    - statement by professional groups, 533-534
    - in tumor patients, 663-672  - incorporation into triglycerides, 1205-1214
  - plasma levels
    - in chemical diabetes in childhood, 220
    - dissociation from insulin response to glucose infusions, 1277-1285
    - diuretics affecting, in diabetes, 101-107
    - in glucose tolerance tests, 255-267, 276-278, 289-293, 301-303, 328
    - insulin/glucose ratios in children, 286, 295-300, 304
    - loading in dogs, homeostatic responses to, 1367-1374  - metabolism of
    - by adipose tissue, cortisol affecting, 503-506
    - growth hormone affecting, 1243-1246
    - oral contraceptives affecting, 841-852
    - by rat pancreatic islets, 467-471  - nicotinic acid affecting turnover and oxidation of, 1193-1202
  - normoglycemic glycosuria in pregnancy, 755-760
  - responses to, after methylprednisolone therapy, 39-48

## Glucose—(Continued)

- sodium-dependent transport in intestine, 649–654
- and sodium retention in starvation, 867–874
- synthesis in platelets, 29–37
- tolerance tests
  - in asymptomatic glucosuria, 363–368
  - cortisone, 289–293
  - in intermittent claudication, 1395–1401
  - interpretation criteria for, 273–315
  - intravenous, in chemical diabetes, 247–253
  - plasma cortisol during, 745–747
  - reliability of, 237–245
  - screening for intolerance in multiphasic program, 319–322
  - in siblings of children with diabetes, 255–267, 351–354
  - sum of blood sugar values in, 285–286, 295–300
  - urinary, mass screening of children for diabetes detection, 323–326
- Glucose-6-phosphatase, microsomal, ethanol affecting, 799–804
- Glucose-6-phosphate dehydrogenase deficiency, cortisol metabolism in, 1443–1447
- Glucosuria, asymptomatic, glucose tolerance testing in, 363–368
- $\beta$ -Glucuronidase activity in serum, in chemical diabetes in childhood, 225
- Glutamine and glutamate metabolism, and gluconogenesis, 199–200
- Glutethimide, radioassay for measurements of, 1150
- Glyceride synthesis, physical training affecting, 473–479
- Glycine, high plasma levels in women, 835–838
- Goldner, Martin, 645–647
- Gonadotropins
  - binding to receptors, 1060
  - food restriction affecting levels of, 439–440
  - radioimmunoassay of, 1003–1005
- Growth hormone
  - affecting body composition, 589–594
  - binding to receptors, 1060
  - clomiphene affecting secretion of, 1269–1274
  - L-dopa affecting release of, 773–777
  - plasma levels
    - in chemical diabetes in childhood, 255–267
    - in glucose tolerance tests, 289–293
  - purified releasing factor affecting secretion of, 769–771
  - regulation of, 987–991
  - secretion and action of, 1235–1249
  - dietary regulation of, 1491–1497
- Guanosine monophosphate, cyclic
  - and growth hormone secretion, 769–771
  - radioimmunoassay of, 1139–1143
- Haptoglobin, radioimmunoassay of, 1104
- Heart
  - glyceride synthesis in, exercise affecting, 472–479
  - ischemic disease of, and fatty acids in plasma, 1349–1356
  - pyruvate kinase isoenzymes in myocardial infarction, 493–500
- Hemoglobin, alterations in childhood diabetes, 269–271
- Hemopexin, radioimmunoassay of, 1104
- Hepatitis, pyruvate kinase isoenzymes in, 493–500
- Hepatitis B antigen, radioimmunoassay of, 1111–1116
- Hereditary factors in diabetes, 355–357
- HL-A antigens, radioimmunoassay of, 1105
- Homeostatic responses, to glucose loading in dogs, 1367–1374
- Homocystine excretion,  $\alpha$ -aminoisobutyric acid affecting, 605–609
- Hormonal induction of enzymes, 85–98
- Hydrochlorothiazide, effects in diabetes, 101–107
- Hydroxy-deoxycorticosterone secretion, aminoglutethimide affecting, 123–131
- Hypothalamus
  - food restriction affecting function of, 435–441
  - growth hormone releasing factor in, 769–771
  - ventromedial lesions in
    - affecting protein metabolism, 1377–1386
    - hyperphagia with, and acetate utilization, 1459–1465
- Hypoxia-pretreated rats, endobronchial lavage phospholipids in, 1345–1347
- Immunoglobulins, radioimmunoassays of, 1099–1102
- Inborn errors of metabolism, vitamin-responsive, 1319–1340
- Insulin, 973–977
  - affecting tyrosine aminotransferase activity, 96–98
  - and alanine metabolism, 183–185
  - big, big insulin studies, 703–712
  - binding to receptors, 1060
  - chlorpropamide affecting secretion of, in diabetes, 723–732
  - clofibrate affecting secretion of, 763–766
  - fasting affecting secretion of, 1253–1261
  - inhibition of release in hypovolemic shock, 1449–1457
  - pancreatic content after tolbutamide injections, 1389–1392
  - plasma levels
    - in chemical diabetes in childhood, 223, 255–267

## Insulin—(Continued)

- during glucose infusions, dissociation from blood glucose, 1277-1285
  - during glucose loading in young dogs, 1372
  - in ethanol-induced hypoglycemia, 111-120
  - glucagon affecting, after methylprednisolone therapy, 39-48
  - glucose/insulin ratios in children, 286, 295-300, 304
  - and glucose tolerance in intermittent claudication, 1395-1401
  - in glucose tolerance tests, 255-267, 278-279, 286, 289-293, 329
  - in obese children, 359-362
  - in tumor hypoglycemia, 663-672
  - as therapy in chemical diabetes in childhood, 403-411
- Intelligence test performance, and plasma amino acid levels, 1437-1441
- International Meeting of Endocrinology, 762
- Intestines. *See* Gastrointestinal tract
- Ischemic heart disease. *See* Myocardial infarction
- Kidney
- bicarbonate reabsorption affected by potassium and extracellular volume, 481-491
  - cortical transport of 2-methyl-D-glucoside, 67-75
  - metastatic tumor with ectopic hyperparathyroidism, 147-154
  - muscle magnesium and potassium content in azotemia, 23-26
  - and normoglycemic glycosuria in pregnancy, 755-760
  - response to aldosterone, sex dependence of, 923-926
  - unilateral nodular diabetic glomerulosclerosis, 713-722
  - vitamin D in renal insufficiency, 522-523
- Kimmelstiel-Wilson disease, unilateral, 715-722
- Klinefelter's syndrome, Leydig cell function in, 875-883
- L-Kynurenine sulfate, and metabolite excretion with oral contraceptive use, 1499-1504
- Lavage phospholipids, endobronchial, in hypoxia-pretreated rats, 1345-1347
- Leukemia, glucocorticoids in, and phosphate depletion, 611-615
- Leydig cell function, in Klinefelter's syndrome, 875-883
- Lipids
- estrogen-induced hyperlipidemia, chicks for study of, 423-433

## metabolism of

- in fasting, and hepatic acetate levels, 81-84
  - oral contraceptives affecting, 841-852
- plasma levels
- in chemical diabetes in childhood, 261-262
  - fasting, and adipose tissue morphology, 1311-1316
  - and glucose tolerance in intermittent claudication, 1395-1401
- Lipoproteins
- familial combined hyperlipoproteinemia, 1403-1427
  - plasma levels in chemical diabetes in childhood, 223
- Liver
- acetate levels in altered lipid metabolism, 81-84
  - androgen metabolism in cirrhosis, 695-701
  - carbohydrates incorporated into triglycerides of, 1205-1214
  - enzyme rhythm affected by dietary proteins, 1175-1183
  - glyceride synthesis in, exercise affecting, 473-479
  - microsomal glucose-6-phosphatase activity after ethanol, 799-804
  - pyruvate kinase isoenzymes in hepatitis, 493-500
- Long-acting thyroid stimulator, affecting thyroid cyclic AMP, 1185-1190
- Luteinizing hormone
- binding to testis preparations, 1225-1232
  - food restriction affecting levels of, 439-440
  - radioimmunoassay of, 1003-1005
  - releasing factor, radioimmunoassay of, 1005-1008
  - synthetic LH-RH affecting release of, 77-79
- Lymphocyte antigens, human, radioimmunoassay of, 1105
- Magnesium
- muscle content of, in azotemia with hypermagnesemia, 23-26
  - plasma and erythrocyte levels in fasting obese subjects, 535-546
- Medroxyprogesterone acetate, radioassay for measurements of, 1146
- Melanocyte-stimulating hormone, radioimmunoassay of, 999
- $\alpha$ -Methyl-D-glucoside, transport by kidney cortex, 67-75
- 3-Methylhistidine excretion, and muscle protein catabolism in starvation, 1429-1435
- Methylprednisolone, metabolic effects of, 39-48
- Mineralocorticoid secretion, amino-glutethimide affecting, 123-131

- Morphine, radioassay for measurements of, 1146
- Mucoid levels in serum, in chemical diabetes in childhood, 223
- Muscle
- catabolism in starvation, and 3-methylhistidine excretion, 1429-1435

- Prediabetes, 212, 232-235
- Pregnancy
- normoglycemic glycosuria in, 755-760
  - tolbutamide injections in, affecting offspring, 1389-1392
- Prolactin
- binding to receptors, 1060
  - radioimmunoassay of, 1039-1043
- Propranolol, diabetic coma from, 685-692
- Prostaglandins, radioimmunoassays of, 1129-1135
- Protein
- catabolism in muscle in starvation, and 3-methylhistidine excretion, 1429-1435
  - dietary, and hepatic enzyme rhythm, 1175-1183
  - in endobronchial lavage, in hypoxia-pretreated rats, 1345-1347
  - growth hormone affecting synthesis of, 1246-1247
  - metabolism in rats with ventromedial hypothalamic lesions, 1377-1386

- Protein—(Continued)  
radioimmunoassays of, 1097–1105  
Pulse waves, arterial, in chemical diabetes in childhood, 224  
Pyruvate kinase isoenzymes, in muscular dystrophy and in myocardial infarction, 493–500  
  
Quinolinic acid, excretion after oral contraceptives, 165–170  
  
Radioimmunoassay  
of adrenal steroids, 995–1000  
of calcitropic hormones, 735–743, 1013–1019  
for drug measurements, 1145–1150  
of enzymes, 1089–1094  
of estrogens, 1083–1086  
of gastrin, 1033–1037  
of glucagon, 979–984  
of hepatitis B antigen, 1111–1116  
of nucleotides, 1139–1143  
of peptide hormone binding to receptors, 1059–1067  
of posterior pituitary peptides, 1047–1055  
of prolactin, 1039–1043  
of prostaglandins, 1129–1135  
of proteins in serum, 1097–1105  
of renin-angiotensin system and aldosterone, 1027–1030  
of sex hormones, 1003–1008, 1225–1232  
of thyroid hormones, 1021–1024  
tumor markers in, 1119–1124  
of vitamin B<sub>12</sub> and folic acid, 1075–1080  
Renin  
radioimmunoassay of, 1027–1030  
and sodium retention in starvation, 867–874  
Retinol binding protein, radioimmunoassay of, 1104  
Rickets, vitamin D-resistant, 520–522  
  
Sarcoidosis, vitamin D in, 519  
Screening of children, for diabetes detection, 319–326  
in siblings of children with diabetes, 351–354  
Sex-binding globulin, testosterone binding by, 623–625  
Sex hormones, radioimmunoassay of, 1003–1008, 1225–1232  
Shock, hypovolemic, inhibition of insulin release in, 1449–1457  
Sialic acid levels, in chemical diabetes in childhood, 223  
Sodium  
excretion in starvation, 675–681  
simultaneous measurements of total exchangeable K and Na, 133–137  
and sugar transport in intestine, 649–654  
Splanchnic exchange of FFA, exercise affecting, 815–820  
Starvation. *See* Fasting  
Sugars. *See* Carbohydrate; Glucose  
Sulfonylurea compounds  
in chemical diabetes in childhood, 373–402  
daily injections of tolbutamide in pregnancy, affecting offspring, 1389–1392  
effects in clinical conditions, 1155–1161  
*See also* Chlorpropamide  
  
Testis, homogenates binding to LH, 1225–1232  
Testosterone, binding by sex-binding globulin, 623–625  
Theophylline, affecting calcium transport across beta-cell membrane, 455–465  
Thiazide diuretics, affecting calcium metabolism, 139–145  
Thyroid gland  
food restriction affecting function of, 438–439  
radioimmunoassay of, 1021–1024  
suppression tests in euthyroid Graves' disease, 1357–1365  
Thyroid-stimulating hormone  
adiphenine affecting secretion of, 859–864  
affecting thyroid cyclic AMP, 1185–1190  
binding to receptors, 1060  
and response to releasing hormone in euthyroid Graves' disease, 1357–1365  
Thyrotropin. *See* Thyroid-stimulating hormone  
L-Thyroxine, in treatment of obesity, 617–622  
Thyroxine-binding globulin, radioimmunoassay of, 1104  
Tolbutamide. *See* Sulfonylurea compounds  
Triglycerides  
and familial combined hyperlipoproteinemia, 1403–1427  
familial hypertriglyceridemia, 1287–1308  
glucose and fructose incorporation into, 1205–1214  
oxandrolone affecting turnover of, 807–813  
plasma levels  
in chemical diabetes in childhood, 223  
and cholesterol synthesis in hypercholesterolemia, 895–910  
and precursors of fatty acids in obesity, 779–784  
transport kinetics in diabetes, 1–19  
uptake by adipose tissue, 913–920  
Tryptophan metabolites, excretion after oral contraceptives, 165–170, 1499–1504  
Tryptophan pyrrolase, dietary protein affecting rhythms in, 1175–1183

- D-Tubocurarine, radioassay for measurements of, 1146
- Tumor hypoglycemia, 663-672
- Tumor markers, in radioassays, 1119-1124
- Tyrosine aminotransferase, steroidal induction of, 89-93
- Tyrosine transaminase, dietary protein affecting rhythms in, 1175-1183
- Uric acid  
  excretion of, 952-954  
  pathogenesis of hyperuricemia, 939-954  
  synthesis of, 942-952
- Urine volume, during food restriction, 439
- Vasopressin, radioimmunoassay of, 1047-1049
- Virus antigens, radioimmunoassay of, 1111-1116
- Vitamin B<sub>12</sub>, radioimmunoassay of, 1075-1080
- Vitamin C, metabolism in castrated rats, 1485-1489
- Vitamin D  
  and anticonvulsant therapy, 519-520  
  and bone metabolism disorders, 513-516  
  and gastrointestinal disorders, 516-519  
  in hypoparathyroidism, 520  
  intermediary metabolism of, 507-510  
  mechanism of action of, 510-513  
  radioimmunoassay of, 1018-1019  
  in renal insufficiency, 522-523  
  rickets resistant to, 520-522  
  and sarcoidosis, 519
- Vitamin-responsive inborn errors of metabolism, 1319-1340
- Xylitol toxicity, 885-893
